

SECTION 11.

BOVIDAE

CHAPTER 11.1.

BOVINE ANAPLASMOSIS

Article 11.1.1.

General provisions

Standards for diagnostic tests and vaccines are described in the *Terrestrial Manual*.

Article 11.1.2.

Recommendations for importation from countries considered infected with bovine anaplasmosis

For cattle

Veterinary Authorities of free countries should require the presentation of an *international veterinary certificate* attesting that the *animals*:

- 1) showed no clinical sign of bovine anaplasmosis on the day of shipment; and
- 2) were, since birth, kept in a *zone* known to be free of bovine anaplasmosis for the previous two years;

OR

- 3) showed no clinical sign of bovine anaplasmosis on the day of shipment; and
- 4) were subjected to a diagnostic test for bovine anaplasmosis with negative results during 30 days prior to shipment; and
- 5) were treated with an effective drug such as oxytetracycline for five consecutive days at a dose of 22 mg/kg (under study);

AND

in either of the above cases:

- 6) were treated with an acaricide and, if necessary, a repellent against biting insects prior to shipment and were completely free of ticks.
-
